

# INTRODUCING THE 141" SABER X-15 PLUS PAPER CUTTER

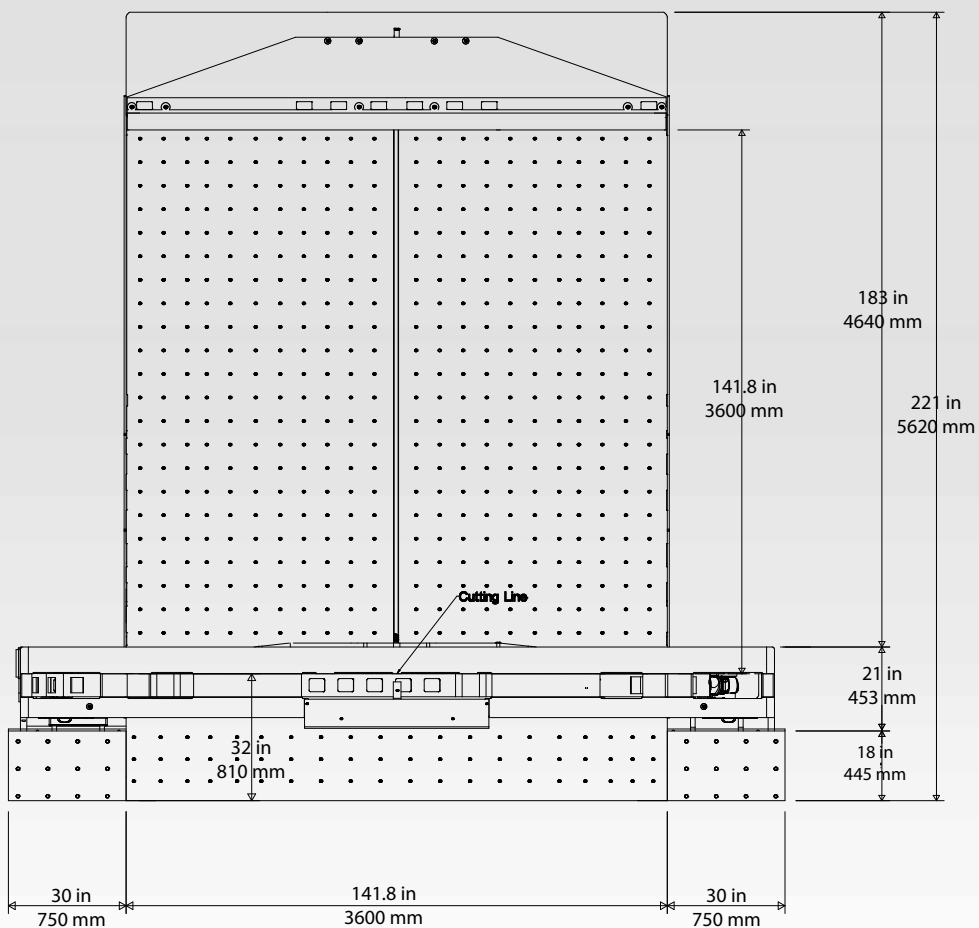

- Microcut Wide Screen (15") computerized back gauge system:
  - \*Back gauge speed variable between 3" to 16" per second
  - \*Color touch screen
  - \*CIP-3/4 compatible
  - \*Network ready
  - \*Management information system (MIS) included
- 141" maximum cut length
- 141" maximum cut width
- 5" maximum cut height
- 8" minimum cut length
- Heavy duty 8 inch wide clamp
- Combination ball bearing lead screw and linear bearing back gauge
- Stainless steel table surfaces with low pressure air jets
- Multiple air blower motors for low pressure air table jets
  - \*Programmable from Microcut computer
- Clamp operated by heavy duty hydraulic cylinder under center of table
- Hydraulic oil cooling included
- Variable clamping force from 500 - 20,000 lbs
  - \*Programmable from Microcut computer
- Variable knife speed to assist cutting various product types
- Knife operated by hydraulic cylinders located at each side of the knife beam below table level
- Knife change device using a central lifting unit in knife beam
- Knife height setting and leveling is fully automated from Microcut computer
- Foot treadle operation for soft clamping is coupled with infrared safety curtain interruption for safety
- Energy efficient main motors operate only during cutting/clamping
- 460 volt, 3 phase, 60Hz, 30 amp power required
- Infra red safety eye beams
- Push button safety controls (3 operator stations)
- Meets all US, CSA and CE safety requirements
- Two high speed blades
- Twelve plastic cutting sticks
- Parallel or eccentric cut option
